RESULT 486 US-09-788-038-40/c

Sequence 40, Application US/09788038
Patent No. 6599703
GENERAL INFORMATION:
APPLICANT: Jones, Douglas H.
TITLE OF INVENTION: An Iterative and Regenerative DNA

```
GENERAL INFORMATION:
APPLICANT: PESCHLE, Cesare
APPLICANT: ZIEGLER, Benedikt L
APPLICANT: ZIEGLER, Benedikt L
TITLE OF INVENTION: Compositions and Methods f
TITLE OF INVENTION: Populations in Mammals
FILE REFERENCE: 9855-26U1
CURRENT APPLICATION NUMBER: US/09/322,352A
CURRENT FILING DATE: 1999-05-28
PRIOR APPLICATION NUMBER: US 60/087,153
PRIOR APPLICATION NUMBER: US 60/087,153
PRIOR TILING DATE: 1998-05-28
NUMBER OF SEQ ID NOS: 10
SOFTWARE: PatentIn version 3.1

Patent No. 6668974
GENERAL INFORMATION:
APPLICANT: Klann, Richard C.
TITLE OF INVENTION: A SPECIFIC, HIGHLY SENSITIVE, NESTED PCR
TITLE OF INVENTION: DETECTION SCHEME FOR THE PSEUDORABIES VIF
NUMBER OF SEQUENCES: 11
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           SEQ ID NO 1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 1, Application US/09141047A Patent No. 6043085
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Best Local Similarity Matches 17; Conserv
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  GENERAL INFORMATION:
